AthenaFlow

README

Athena Workflow Marketplace

Marketplace repository for:

1. Claude plugins (`plugins/`)
2. Athena workflows (`.workflows/`)

Spec

Workflow and manifest contracts are defined in:

- RFC 0001: Long-Running Workflow Definition (Claude Plugin Compatible)

Use this RFC as the source of truth for workflow behavior, lifecycle, and Claude plugin compatibility (skills, tools, and sub-agent/task patterns).

Repository Structure

```
.
├── .claude-plugin/
│   └── marketplace.json            # Plugin catalog
├── .athena-workflow/
│   └── marketplace.json            # Workflow catalog
├── .workflows/
│   └── e2e-test-builder/
│       ├── workflow.json
│       └── system_prompt.md
└── plugins/
    ├── e2e-test-builder/
    └── site-knowledge/
```

Install This Marketplace (Claude Plugin Consumers)

```
# From GitHub
claude plugin marketplace add lespaceman/athena-workflow-marketplace

# From local clone
claude plugin marketplace add ./athena-workflow-marketplace
```

Install a Plugin

```
claude plugin install e2e-test-builder@athena-workflow-marketplace
```

Installation Scopes

```
claude plugin install e2e-test-builder@athena-workflow-marketplace --scope user
claude plugin install e2e-test-builder@athena-workflow-marketplace --scope project
claude plugin install e2e-test-builder@athena-workflow-marketplace --scope local
```

Available Plugins

e2e-test-builder

Iterative workflow runner for adding Playwright E2E tests to existing codebases.

SKILL	DESCRIPTION
`/add-e2e-tests <url> <feature>`	Full pipeline orchestrator
`/analyze-test-codebase [path]`	Detect Playwright config and conventions
`/plan-test-coverage <url> <feature>`	Build prioritized coverage plan
`/explore-website <url> <goal>`	Extract selectors and behavior via browser interaction
`/generate-test-cases <url> <journey>`	Generate TC-ID based structured specs
`/write-e2e-tests <description>`	Implement executable Playwright tests

site-knowledge

Auto-applied site-specific automation patterns.

SKILL	DESCRIPTION
`airbnb`	Airbnb automation patterns
`amazon`	Amazon automation patterns
`apple-store`	Apple Store flow patterns
`apple-testing-guide`	Apple testing-specific guidance

Available Workflows

Workflows are registered in `.athena-workflow/marketplace.json` and implemented under `.workflows/`.

WORKFLOW	SOURCE
`e2e-test-builder`	`.workflows/e2e-test-builder/workflow.json`

Workflow intent:

- Orchestrate long-running multi-session execution
- Reuse existing Claude plugin capabilities
- Keep tracker-based progress and completion semantics portable across runtimes

Add a New Plugin

1. Create a plugin directory under `plugins/<name>/`.
2. Add `plugins/<name>/.claude-plugin/plugin.json`.
3. Register plugin in `.claude-plugin/marketplace.json` under `plugins[]`.

Minimal `plugin.json`:

```
{
  "name": "my-new-plugin",
  "description": "What this plugin does",
  "version": "1.0.0",
  "author": {
    "name": "Your Name"
  }
}
```

Add a New Workflow

1. Create `.workflows/<workflow-name>/workflow.json`.
2. Add any workflow-local assets in the same directory.
3. Register workflow in `.athena-workflow/marketplace.json` under `workflows[]`.
4. Keep schema/behavior aligned with RFC 0001.

Workflow registration example:

```
{
  "workflows": [
    {
      "name": "my-workflow",
      "source": "./.workflows/my-workflow/workflow.json",
      "description": "My reusable workflow"
    }
  ]
}
```

Manage Plugin Marketplace (Claude)

```
claude plugin marketplace list

claude plugin marketplace update athena-workflow-marketplace

claude plugin marketplace remove athena-workflow-marketplace

claude plugin list

claude plugin disable e2e-test-builder@athena-workflow-marketplace

claude plugin enable e2e-test-builder@athena-workflow-marketplace

claude plugin update e2e-test-builder@athena-workflow-marketplace

claude plugin uninstall e2e-test-builder@athena-workflow-marketplace

claude plugin validate ./plugins/my-plugin
```
